(for functional wax ups, facebow record, etc.)**

**Excel Dental Studios  
(818) 886-7645**

## **LIST OF ITEMS NEEDED FOR A DIAGNOSTIC WAX UP**

1. Detailed laboratory instruction and narrative, to include:
2. Specify teeth numbers  
Type of restoration desired  
Purpose of treatment (ie: patient's goals and desires)  
Patient's age
3. Photographic records:  
Full face, frontal, 1:10  
Full smile, non retracted frontal, 1:2  
Retracted frontal view, 1:2  
Any other view that depicts relevant perspective
4. Impression of both arches  
Polyvinyl or polyether impression recommended, so we don't have to duplicate models several times and provisionals will fit much better
5. Bite registration  
between two arches  
centric bite, not wax or duralay, but elastomeric material  
Ensure patient is not retruded or underclosed
6. Horizontal reference  
Midliner with bubble level glued in place  
Stickbite (use plastic brush handle instead of Q-tip wood applicator)
7. Any other relevant items or record, ie:  
Reference from Smile Guide, magazines, x-rays, etc.
